

Atividade 8

1. Usuário devAdm com apenas leitura

```
db.createUser({
  user: "meteorologista",
  pwd: "senha123",
  roles: [ { role: "read", db: "estacao_meteorologica" } ]
})
```

The screenshot shows a terminal window titled "mongosh mongodb://127.0.0.1:27017/?directConnection=true&serverSelectionTimeoutMS=2000". The terminal output includes a notice about anonymous usage data collection and a warning that access control is not enabled. The user then enters the command to create a user, which is displayed as follows:

```
clima_alerta>
| user: "meteorologista", a
| pwd: "senha123",
| roles: [ { role: "read", db: "estacao_meteorologica" } ]
| })
clima_alerta>
```

2.conectar usuário ao banco

```
mongosh --host 127.0.0.1 --port 27017 -u "meteorologista" -p "senha123" --
authenticationDatabase "estacao_meteorologica"
```

```
Windows PowerShell
PS C:\Users\Fatec258> mongo --host 127.0.0.1 --port 27017 -u "meteorologista" -p "senha123" --authenticationDatabase "estacao_meteorologica"
Current Mongosh Log ID: 6a2b3ccc89af3c0ec1abc113
Connecting to:
MongoServerError: Authentication failed.
PS C:\Users\Fatec258>
```

3.
&"C:\Program Files\MongoDB\Tools\100\bin\mongoexport.exe" `
--db estacao_meteorologica `
--collection leituras `
--out "./leituras.json" `
-u "meteorologista" `
-p "senha123" `
--authenticationDatabase "estacao_meteorologica"

```
Windows PowerShell
PS C:\Users\Fatec258> where mongoexport
2026-06-11T19:58:21.040-0300 error parsing command line options: expected argument for flag '/d, /db'
2026-06-11T19:58:21.069-0300 try 'mongoexport --help' for more information
PS C:\Users\Fatec258>
```

4.

```
& "C:\Program Files\MongoDB\Tools\100\bin\mongoimport.exe" `
```

```
--db estacao_meteorologica `
```

```
--collection leituras `
```

```
--file leituras.json `
```

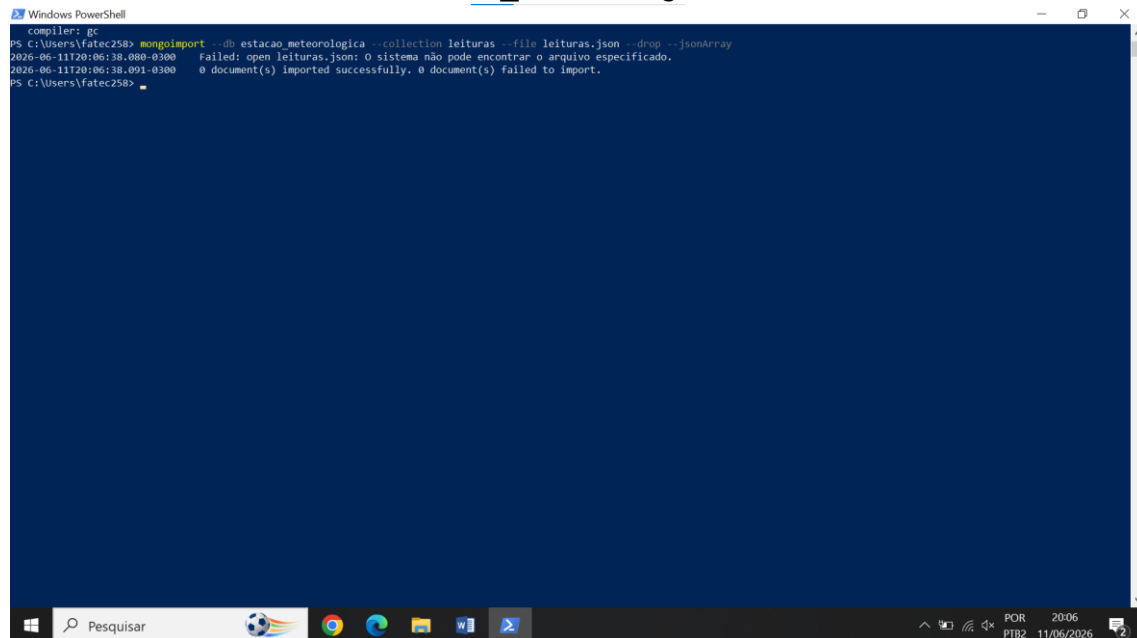

```
--drop `
```

```
--jsonArray `
```

```
-u "meteorologista" `
```

```
-p "senha123" `
```

```
--authenticationDatabase "estacao_meteorologica"
```

```
Windows PowerShell
compiler: gc
PS C:\Users\fatec258> mongoimport --db estacao_meteorologica --collection leituras --file leituras.json --drop --jsonArray
2026-06-11T20:06:38.080-0300 Failed: open leituras.json: O sistema não pode encontrar o arquivo especificado.

```

5.

```
const mongoose = require("mongoose");
```

```
const url =
```

```
"mongodb://meteorologista:senha123@127.0.0.1:27017/estacao_meteorologica?authSource=clima_alerta";
```

```
mongoose .connect(url) .then(() => { console.log("Conexão bem sucedida"); })
```

```
.catch((erro) => { console.error("Erro ao conectar:", erro.message); });
```
